PORTFOLIO / SELECTED WORK

Featured work.

Practical projects, real implementation work, and the decisions behind building for the web.

Explore all projects ↗

01

E-COMMERCE EXPERIENCE LIVE PROJECT

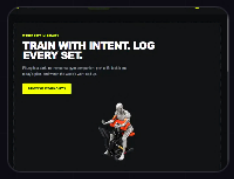

Bazar Dor

A responsive product discovery experience with category browsing and clear product information.

Next.js · TypeScript · Tailwind CSS

GitHub ↗ Live demo ↗

02

WORKOUT DISCOVERY & PLANNING LIVE PROJECT

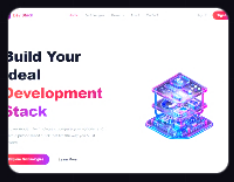

Fit Log

An API-driven workout application with dynamic exercise details and workout planning.

Next.js · React · TypeScript · API

GitHub ↗ Live demo ↗

03

DEVELOPER TOOL SOURCE CODE

Dev Stack Builder v2

A developer-focused project for exploring and assembling a web development stack.

Web Development · GitHub

GitHub ↗

BEHIND THE CODE / BUILD LOG

Engineering notes.

Lessons from debugging, API integration, and the decisions that shape each implementation.

Read the build log ↗

NOTE_01

Debugging lessons

Tracing issues and understanding the root cause.

Read note ↗

NOTE_02

Working with APIs

Connecting interfaces to real data and endpoints.

Read note ↗

NOTE_03

Rendering & hydration

Understanding rendering behavior and mismatches.

Read note ↗

06 / STACK

A stack I actually build with.

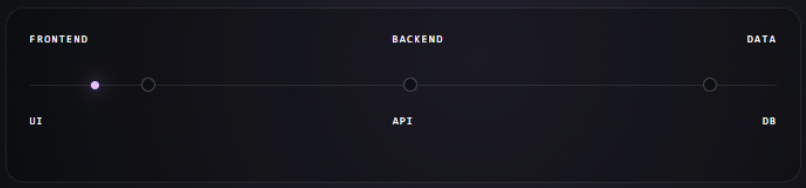

Not a list of logos. Each technology connects to something I have actually built, practiced, or used.

EVIDENCE.SYSTEM / ONLINE

● CURRENT FOCUS

Next.js

Full-stack React framework used for routing, layouts, rendering, and production web apps.
